The battery energy storage system (BESS) containers are based on a modular design. They can be configured to match the required power and capacity requirements of client's application.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

The new battery container, housed in a standard 10ft container, streamlines installation with its positioning tolerance space and closed-cabinet wiring design to shorten installation timelines.

A: Yes, we can provide remote guidance installation and off grid system support. Once receive your question, the supplier will answer you as soon as possible.

Supplier highlights: This supplier is both a manufacturer and trader, primarily exporting to the United States, South Korea, and Germany. With a 94.2% positive review rate, they offer ...

We will assemble all batteries, system management software, and accessory products in containers and directly ship them by sea.
