---

The facility is designed for a capacity of 10 GW per year, with a modular setup that allows for quick expansion to 20 GW as needed. It ...

In this study, we present strategies to realize high-efficiency SHJ solar cells through combined theoretical and experimental studies, starting from the optimization of Si ...

Learn how Heterojunction Cell Technology (HJT) offers high performance and efficiency for your solar investment. Watch our short explainer videos to understand the unique benefits of HJT ...

Once fully operational, the plant will have an annual capacity of 10 GW for n-type solar cells and 2 GW for modules. With the completion of the first phase, the facility has ...

Jinko Solar announced that its 10GW N-type high-efficiency cell and module project in the Middle East is expected to be officially put into production at the end of 2025 or early 2026.

State Power Investment Corporation (SPIC) broke ground on a 10 GW high-efficiency heterojunction (HJT) solar cell and module ...
