I made back the money I spent on it in just one season, and now I have free electricity, with 250 watts available 24 hours a day," ...

Renewable types of energy, especially solar energy, have increased rapidly in recent years and have become an important source of power generation in developed and developing countries.

From the results of the present work, it can be concluded that Baghdad's geographical area and surroundings are promising for investing in solar energy to produce ...

Baghdad (IraqiNews) - Iraq is set to inaugurate its first utility-scale solar power plant with a capacity of 250 megawatts (MW) by the end of the current year.

Contracts have been signed to construct major solar farms, with additional plans for hybrid solar-wind power stations in provinces like Nineveh, Najaf, and Muthanna.

With the result of the cost calculations done for the cities, it's found out that photovoltaic solar power panel systems that cost 9628 \$ in Baghdad are good enough to fulfill.
