What is a wit 35kW inverter?

High Efficiency: With a maximum efficiency of 98.00%, the WIT 35kW inverter ensures that a minimal amount of solar energy is lost during the conversion process, maximizing the energy available for storage or immediate use.

Can a 35kW solar array be put on an inverter?

A 35kW solar array can be put with an inverter with an AC output of 26.25kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

What is a 36kw inverter?

The 36kW is an extension of the existing 23kW and 28kW inverter line and features a dual MPPT design with up to 98.6% conversion efficiency and wide operating window of 240-950Vdc. An installer friendly and integrated wire box simplifies installation and reduces BoS costs.
