---

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution ...

The Governmental Emergency Hospital in Sidon, commonly known as the Turkish Hospital, has officially launched a significant solar ...

Designed for harsh environments, our PV panels are built for extreme environmental adaptability (-40°C to +85°C operating temperature, 5400Pa snow load) and incorporate fire and corrosion ...

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic ...

Once operational, it will be the first time a renewable energy source will have been used to produce electricity, heating and cooling in a tri-generation system.

We offer a range of specialized prefabricated building types, each engineered to meet specific deployment and functional requirements within our comprehensive photovoltaic hospital systems.
