Why should ASEAN standards be harmonised for air conditioner testing?

The specific objective of this project is to harmonize standards for testing methods for air conditioners among ASEAN Member States, as the necessary preliminary step towards achieving the long-term objectives under the ASEAN Plan of Action for Energy Cooperation 2016-2025.

How many air conditioners are in the ASEAN region?

Today, the ASEAN Regional Policy Roadmap for Energy Efficient Room Air Conditioners (2022-2025) indicates that Air conditioner ownership in the ASEAN region is projected to increase significantly, with estimates suggesting that the number of units will grow from nearly 50 million in 2020 to approximately 300 million by 2040.

Will ASEAN air conditioner ownership continue to grow?

With continued economic development and population growth across the region, the International Energy Agency (IEA) projects that air conditioner ownership across the ASEAN Member States (AMS) will continue to grow.

Are solar air conditioners eco-friendly?

Apart from this, solar air conditioners are categorized as environment-friendly technology because they don't require much raw material to function. All they need to produce energy are the solar panels which are ecofriendly and available in abundance. 3. Easy to Maintain
