If storage is considered an energy consumer for taxation purposes, energy offtake by storage will constitute a taxable event. Subsequently, the discharge energy will be taxed once again when ...

With increasing investments in renewable energy and grid modernization, the country's energy storage sector is experiencing unprecedented growth. This article explores the driving forces, ...

To address Armenia's electricity system challenges, two main options are currently discussed: the expansion of transmission capacity with Iran and Georgia to export surplus solar energy, as ...

Overview Thermal solar Potential Photovoltaics See also External links In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters). Solar water-heaters can be used for space heating, solar cooling, etc. In order to generate heat, they use solar energy from the Sun. Modern solar water heaters can cause water to boil even in winter. Solar thermal collectors are used throughout the territory of Armenia. One buil...

Armenia, with 300+ annual sunny days, is quietly becoming a testbed for high-altitude solar innovation. Last month, the government approved a 40% renewable energy target by 2030 - ...

Despite the progress, challenges remain in Armenia. The integration of variable renewable energy sources like solar requires upgrades to the existing grid infrastructure. ...
