The Asmara Central Energy Storage Power Station demonstrates how modern battery systems can unlock renewable energy's full potential. As African nations work toward COP26 ...

As industries shift toward renewable energy and grid independence, manufacturers like Asmara are leading the charge. This article explores how lithium battery technology is reshaping ...

In 2023, a 100MW solar-plus-storage facility in Asmara received \$12 million in subsidies, cutting its payback period from 8 to 5 years. Projects like this highlight how subsidies can transform ...

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

iM3NY offers one of the first US-manufactured cells based on technology developed in the United States. Our proprietary P-Series phosphate-based chemistry provides 10-20% better energy ...

Lithium Iron Phosphate (LiFePO₄) batteries continue to dominate the battery storage arena in 2025 thanks to their high energy density, compact size, and long cycle life.
