Who approved acenergy's battery energy storage system in Australia?

The NSW Independent Planning Commission has approved AC Energy's 250MW/1,100MWh Yanco battery energy storage system in Australia.

Where is acenergy's battery energy storage system located?

Image: Leeton Shire Council. The New South Wales (NSW) Independent Planning Commission has approved AC Energy's 250MW/1,100MWh Yanco battery energy storage system (BESS) in Australia. The project, designated as a State Significant Development, will be located 5km south of Leeton, around 500km west of the state capital, Sydney.

What are Australia's major energy projects?

States like New South Wales and South Australia are leading with major projects, such as: Woreen Battery Energy Storage System (350 MW /1.4 GWh) in Victoria. Portland Energy Park, which will combine storage with renewable generation. These investments support Australia's quick move away from coal.

Why should Australia invest in energy storage systems?

"Energy storage systems, such as big batteries, are a critical part of Australia's future energy mix and act as a reliable back-up system, allowing us to store renewable energy for when it is needed most and keep the lights on under all conditions. It's great to see the high levels of investment we've seen over the past couple of years continue."

Sydney, 9 May 2025 -- AEMO Services, acting as the NSW Consumer Trustee, has launched its sixth competitive tender under the ...

Giant eight-hour battery project changes hands, as new owner cites "tremendous" decline in battery costs and key details of its underwriting agreement in NSW.

Australian energy major AGL has welcomed the approval in New South Wales (NSW) of a large-scale wind power plant with battery storage.

They added 1.5 GW of storage and 5 gigawatt-hours (GWh) of energy output in only three months. As coal plants shut down and renewable energy increases, investors are ...
