What is a battery communications module?

The module stores battery information and can also transmit data to a cloud-based data storage system. Figure 1. Eaton Battery Communications Module The communications module can be mounted either horizontally or vertically.

What is a battery cabinet?

Battery cabinet that includes Lithium-ion batteries, Battery Management System (BMS), switchgear, power supply, and communication interface. Battery cabinet that includes Lithium-ion batteries, Battery Management System (BMS), switchgear, power supply, and communication interface.

What is the Eaton battery communications module?

The Eaton's Battery Communications Module connects with an external battery system to gather information about the battery status and performance. The module stores battery information and can also transmit data to a cloud-based data storage system. Figure 1. Eaton Battery Communications Module

How do you secure a battery communications module?

Secure the facility and equipment rooms or closets with access control mechanisms such as locks, entry card readers, guards, man traps, CCTV, etc. as appropriate. Restrict physical access to cabinets and/or enclosures containing the Battery Communications Module and the associated system. Monitor and log the access at all times.

State of Health (SoH) Vertiv EnergyCore tracks battery health across all levels, enabling smarter maintenance and longer battery life.

Lay the communication cable over the DC cable. Incorporate the rest of the battery modules into the communication cabling within the battery cabinet, working from top to bottom.
