In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

As electric vehicle sales falter, major battery manufacturers are shifting focus to a booming market in large-scale energy storage systems, offering a potential buffer against ...

Chinese firms are on track for a 75% jump this year in global shipments of lithium-ion battery cells for energy storage, according to one estimate.

The surge in sales is driven by data centres and renewables domestically, as well as by Chinese reforms and subsidies that are boosting general demand for energy storage.

The energy storage industry walked a bumpy road in 2025, but eyes are turning toward 2026's tech stack. While lithium-ion remains dominant, pressure is building for longer ...

Developments in batteries and other energy storage technology have accelerated to a seemingly head-spinning pace recently -- even for the scientists, investors, and business ...
