Does Belize have an electricity monopoly?

Belize Electricity Limited (BEL) functions as a legal monopoly for electricity generation, transmission, distribution, and supply in Belize. It was granted a 15-year license in 2000, with an automatic 10-year recurring license beginning in 2015.

Does Belize use solar power?

Belize uses solar power on a smaller scale, with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize, along with Belize Electricity Limited (BEL), intends to launch a pilot project introducing electric vehicles.

Is Belize a good place to invest in energy?

Belize's energy sector is looking to expand in biomass and small-scale solar, as well as create new opportunities in electric vehicles, large-scale solar, liquefied natural gas (LNG), and waste-to-energy. However, Belize remains a net-importer of electricity from Mexico, which makes energy imports expensive and unpredictable.

Will electric buses replace diesel buses in Belize?

The Belizean government envisions a fleet of electric buses to replace the 1960-1970s-era diesel buses that currently serve as the country's primary public transportation network. This is a best prospect industry sector for this country.
