Are battery energy storage systems a good investment?

Battery energy storage systems are keeping grids stable, with a greater renewable energy share, and cutting long-term CO<sub>2</sub> emissions. Investors, local authorities, and landowners count on BayWa r.e. to take their BESS from project origination to installation.

What is a Bess system?

Customers rely on these systems to store excess energy produced during periods of low demand or when renewable energy sources, like solar and wind, are generating surplus power. Our grid-scale BESS solutions range from 1 MWh to over 1,000 MWh as both traditional LV and JST's unique HV cascade solution.

How does Bess work?

Basically, BESS works by storing energy in the form of electrical power produced by renewable energy sources. This energy can then be released into the electricity grid when needed, either when renewable energy production is low or when energy demand reaches its peak.

What is a Bess solution?

Our BESS solutions are: Built, tested and optimized for the North American market for commercial projects. Equipped with integration controls for solar PV and generators Backup power-ready and designed to support onsite load during grid outages Virtual power plant-ready with integrated connectivity for asset monetization
