What are CIGS solar panels?

CIGS (Copper Indium Gallium Selenide) is a cutting-edge thin-film solar cell technology that takes our solar panels to the next level. With improved durability, light sensitivity, and lifetime, our Yuma 200 Watt Flexible Solar Panel with Holes is the perfect choice for anyone looking to harness the power of the sun.

Why should you choose bougerv CIGS flexible solar panel?

?More Stable Output? Thanks to wire-intensive CIGS tech, BougeRV CIGS Flexible Solar Panel is more stable than the monocrystalline solar panel. As a result, it will gather more energy while partly shaded or in low-light conditions.

What is a 200 watt CIGS flexible solar panel?

This 200-Watt CIGS Thin-Film Flexible solar panel is designed to be flexible and adaptable for various surfaces. It's lightweight and can be rolled up, making it suitable for portable use. The product description mentions installation on RVs, trucks, boats, tents, and various roof types.

Can CIGS be used on uneven surfaces?

Thanks to its higher absorption coefficient and ultra-thin profile, it's incredibly flexible and can be used on uneven surfaces like RV and boat roofs, or even at your favorite campsite. Get the most out of your solar setup with our top-of-the-line CIGS technology!

In this post, we'll explain everything you need to know about CIGS solar panels. You'll learn what makes them unique, how they work, and if they're the best choice for you.
