Proposed new rules seek to provide greater flexibility for developers of renewable energy projects with storage components.

Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellin - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for ...

We pioneered the technology over one decade ago, and today almost half our new projects include a storage component. Energy storage is a "force multiplier" for carbon-free energy.

Due to the high dependence on water sources for energy generation and in line with policies aimed at positioning the country as a global leader in sustainability, Colombia has ...

Promote the implementation of energy transition initiatives by building a pipeline of key strategic projects (Projects with National and Strategic Interest, or PINES) with the support ...

Learn how Colombia is leading the way in renewable energy integration, overcoming challenges, and driving sustainable energy solutions for the future.
