In most application scenarios, PCM is usually encapsulated in containers, so the design of lightweight, corrosion-resistant, high thermal conductivity, and low-cost PCM ...

Mobile tanks improve flexibility for storing intermittent energy sources like solar and wind. In addition, they support off-site refueling or power balancing without complex logistics. Their ...

Using our rotomoulding technology we provide light-weighted yet robust electrolyte storage containers, that promise over 20 years of service life without succumbing to corrosion.

NLR electrochemical energy storage innovations accelerate the development of high-performance, cost-effective, and safe battery ...

Lebronze alloys is committed to support the energy transition, notably addressing the challenge of energy storage, both related to intermittent energy sources and related to cars and tracks. In ...

The mobile container laboratory designed specifically for oil research has become a "mobile weapon" for industry scientific research and innovation with its highly integrated ...
