How much does a solar inverter cost?

Most solar panel contractors charge around \$50 to \$100 per hour. You may save \$1,000 to \$2,500 up-front by choosing a string inverter over a microinverter or hybrid inverter. A solar inverter costs \$2,000 on average, with prices often ranging from \$1,000 to \$3,000. That said, some homeowners spend as little as \$800 or as much as \$5,000.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.

How to choose a solar inverter?

The key is to align your budget, performance needs, and long-term goals with the right inverter technology. The latest 2025 solar inverter prices by top brands like Huawei, Growatt, SMA, RENYUAN, and DEYE. Compare models, features, and global trends to make the best choice for your solar project.

Are solar inverters affordable?

Countries like the USA, Germany, and India have introduced financial assistance programs that reduce the overall cost of solar power systems, making solar inverters more affordable for homeowners and businesses.
