How many GW of energy storage installations are there in 2024?

HOUSTON/WASHINGTON,D.C.,March 19,2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts(GW) of installations across all segments,according to the latest U.S. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood Mackenzie.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand,driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However,the Chinese market is entering an era of change.

Where is energy storage growing?

"Energy storage has entered a new phase of growth with its first year of double-digit deployment. We are increasingly seeing the industry's growth diversified across geographic regions,with 30% of storage capacity additions in Q4 2024 represented by New Mexico,Oregon,and Arizona," said Kelsey Hallahan,ACP Sr. Director of Market Intelligence.

Will energy storage grow in 2024?

The energy storage sector maintained its upward trajectory in 2024,with estimates indicating that global energy storage installations rose by more than 75%,measured by megawatt-hours (MWh),year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

Growing energy storage investments impact power markets significantly. Energy storage technologies have been recognized as an important component of future power ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The scene is set for significant energy storage installation growth and technological advancements in 2025. Outlook and analysis of emerging markets, cost and supply chain risk, ...

In several regions, there are substantial opportunities for reforms that will enable energy storage to participate in boosting the reliability and resilience of our power grid - while ...
