The solar installation now generates 50 percent of the terminal's annual energy needs, greatly reducing emissions and improving air quality. In addition to generating power ...

This initiative, in collaboration with the Port Authority of New York and New Jersey and the city of Newark, aims to fulfill half of the terminal's annual electricity requirements.

The 7.2-megawatt installation at Port Newark Container Terminal (PNCT) now generates 50% of the terminal's annual energy needs.

Facilities like the Port of Newark can cut their utility bills with on-site solar, and they can also earn community relations credits by sharing their excess capacity with the local grid.
