In the first scenario, six study cases are analyzed to determine the optimal number, location, and size of distributed generators at peak load demand. The proposed algorithm ...

Multiple state initiatives exist for establishing valuation of distributed energy resources (DER), most notably the California Locational Net Benefits Analysis (LNBA), NY Renewed Energy ...

NY-Sun developed the Value Stack Calculator to help contractors better estimate compensation for specific solar and energy storage projects.

This work sup-ports SDG& E in its efforts to quantify, summarize, and com-pare the cost and benefit streams related to implementation and operation of energy storage on its distribution ...

This comprehensive evaluation framework addresses a critical gap in existing research, providing stakeholders with quantitative references to guide the selection of storage ...

E3 is advancing our approach to calculating "avoided costs" for distributed energy resources (DERs), a keystone of our analysis for more than two decades, to address the ...
