---

It's called a Distributed Power Plant (DPP) -- also known as a Virtual Power Plant (VPP). A DPP is a network of solar and battery systems that are responsive to the energy grid.

Now, homeowners, businesses, and communities can install solar panels on rooftops and produce their own power, which can also be exported to the grid where it can be ...

It's called a Distributed Power Plant (DPP) -- also known as a Virtual Power Plant (VPP). A DPP is a network of solar and battery ...

Distributed generation refers to a variety of technologies that generate electricity at or near where it will be used, such as solar panels and combined heat and power.

According to NYSERDA, distributed solar is generating enough electricity to power more than a million homes and businesses, ...

Distributed generation is the local production of electricity using solar, wind, CHP, fuel cells, and energy storage near the point of use, reducing transmission losses and improving grid resilience.
