Japanese telecom vendor NEC has decided to cease development of 4G and 5G radio access base stations, effectively exiting a segment now overwhelmingly controlled by ...

Critics argue the campaign is an attempt to shoehorn American technology into 5G infrastructure. The U.S. lacks a domestic contender to Huawei, Ericsson and Nokia.

The service enables users to access other operators' 5G networks when their operator does not have 5G coverage. Such initiatives could play a pivotal role in driving 5G adoption in rural areas.

Despite facing sanctions from the United States, Huawei continues to advance its 5G technology by gradually reducing reliance on American components in its base stations. ...

In this article, we examine how three middle powers have confronted such dilemmas through a study of their responses to the prospect of the Chinese company Huawei supplying their ...

This in-depth analysis examines where Chinese telecom networks still exist in the U.S., how they could be exploited, and what actions the U.S. government is taking to mitigate ...
