The paper investigates the performance of a proposed ground heat sink when coupled with the performance of a solar driven air-conditioning system for a ZEH in an exceptionally hot desert ...

Companies are transforming desert buildings in Bahariya Oasis, Egypt's Western Desert, to well-insulated spaces that keep away much of the heat and tackle climate-changing ...

This paper examines the potential of utilizing solar absorption cooling systems in institutional buildings by presenting a case study of a proposed solar absorption cooling ...

The solar plant will produce 3,100 GWh/year, power 500,000 homes, and prevent 1.5 million metric tons of CO₂ annually. The project will generate around 4,000 construction ...

This study investigates the feasibility of implementing a solar-assisted adsorption chiller in an industrial building at the Oriental Weavers International factory located in 10th of ...

Consequently, this study was undertaken with the principal objective of examining the feasibility of substituting conventional electrical split air conditioning units with a solar ...
