Introduction: This paper constructs a revenue model for an independent electrochemical energy storage (EES) power station with the aim of analyzing its full life-cycle ...

Herein, we represented the first implementation of the Gaussian Process Regression to predict the LMBs' energy density to attain the highest accuracy compared to ...

Using a Density Functional Theory (DFT)-simulated dataset of monolayer MXene-based electrodes, AutoML assesses 20 regression models to predict key electrochemical and ...

Studies on long-term health state estimation have attracted engineers and scientists from various disciplines, such as electrical engineering, materials, automation, ...

This comprehensive review systematically analyzes recent developments in electrochemical storage systems for renewable energy integration, with particular emphasis on ...

Enhancing EES systems is paramount to enable the widespread use of electrified vehicles. The course focuses on modeling and estimation methods as necessary tools to extract the full ...
