How many photovoltaic home storage systems will be installed in Europe?

For the entire year, analysts expect more than 1 million photovoltaic home storage systems to be installed across Europe, with demand increasing further in the second half of the year. "Growing interest in dynamic electricity tariffs and increased self-consumption are expected to boost demand among homeowners," said EUPD Research.

How much does a 20 kWh battery cost in Europe?

One driver was falling prices, with EUPD Research reporting an average EUR711 (\$833)/kWh in the first half of the year. From ESS News Demand for residential battery storage systems with up to 20 kWh of capacity remained stable in Europe in the first half of 2025. However, the picture is mixed.

Will European home storage market continue to grow?

However, given the continued decline in storage prices, continued growth is expected in Europe as a whole. The European home storage market is highly competitive among manufacturers.

How competitive is the European home storage market?

The European home storage market is highly competitive among manufacturers. According to surveys by EUPD Research, BYD maintained its leading position in Europe in 2024 with a market share of around 20%, which is expected to increase to 21% this year.

The sector continues to benefit from falling battery prices. A significant drop in lithium prices, combined with intensified competition ...

Median price of behind-the-meter lithium-ion battery storage systems for residential customers in selected European countries from ...

Solar battery backup systems in Europe typically cost between EUR5,000 and EUR15,000, with prices varying significantly based on capacity, brand, and installation requirements.
