Which power stations are in Fiji?

The largest power stations in Fiji are hydroelectric dams in Wailoa and Monasavu, and geothermal power stations at Kinoya and Vuda. The only other power generators in the country are Tropik Woods and Fiji Sugar Corporation, which sell any surplus they generate to the FEA.

Where is the largest dam in Fiji?

The Monasavu Dam is a rock-fill embankment dam on the Nanuku River about 60 kilometres (37 mi) northwest of Suva in Naitasiri Province, Fiji. It is located just above the Monasavu Falls and is both the tallest and largest dam, which also withholds the largest reservoir in the country.

Who is responsible for generating power in Fiji?

The government-owned Fiji Electricity Authority (FEA) is responsible for generating and providing power. The largest power stations in Fiji are hydroelectric dams in Wailoa and Monasavu, and geothermal power stations at Kinoya and Vuda.

What percentage of Fiji's Electricity comes from hydroelectricity?

Hydroelectricity provides just below 60 per cent of the power generated in the country, while oil-based generation provides about 40 per cent; the remaining generation comes from wind, solar and biomass. The government-owned Fiji Electricity Authority (FEA) is responsible for generating and providing power.
