How much energy does Georgia get from solar panels?

Georgia currently gets nearly 3.5% of its electricity from solar panels, which is enough to power more than 359,000 homes. Georgia solar panels can help residents save \$1,700 on energy bills each year. Discover the potential savings with Choose Energy<sup>®</sup>;

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How do I choose a solar power company in Georgia?

Look for a solar power company experienced in Georgia installations so that you have the most energy-efficient solar power system in place for your home. Many companies offer flexible financing options, including power purchasing agreements (PPAs), to lighten the financial burden of solar panel installation.
