When was the first truck fast-charging tender published?

The first tender for the truck fast-charging network at unmanaged rest areas along the federal motorways was published on 16.09.2024. The tender focussed on the planning, construction and operation of fast-charging infrastructure for battery-powered trucks and buses at approximately 130 unmanaged rest areas. The tendering process has ended.

Does Germany have a 'publicly accessible charging infrastructure for electric vehicles'?

Funding under the 'Publicly accessible charging infrastructure for electric vehicles in Germany' funding guideline (2017-2020) (BMV) is also being provided as part of the German Recovery and Resilience Plan (DARP - Deutscher Aufbau- und Resilienzplan) via the European Recovery and Resilience Facility (RRF) under the NextGenerationEU programme.

What is charging infrastructure?

We regard charging infrastructure as a comprehensive system comprising both private and publicly accessible fast and normal charging options.

What is easy charging at the depot?

The "Easy charging at the depot - guide for setting up charging infrastructure for heavy commercial vehicles" guideline, published by the National Centre for Charging Infrastructure in November 2023, aims to help companies with truck fleets get started with electric mobility and support the transformation process towards low-emission logistics.
