In order to prevent the arcing of the DC side of the inverter from causing fires and other hazards, SolaX engineers have developed the integrated AFCI function, which detects the arcing of the ...

AI model live-upgrade ADC + DMA Sampling Arc detection result The AI-based Arc Fault Circuit Interrupter (AFCI) contributes the safe and sustainable development.

In order to prevent the arcing of the DC side of the inverter from causing fires and other hazards, SolaX engineers have developed the integrated AFCI ...

When the arc-fault circuit interrupter (AFCI) is enabled in the inverter, the PV array is monitored for electric arcs since they pose a risk of fire with larger currents.

An integrated grid-connected converter (IGCC) with reactive power compensation and fault regulation ability is proposed. First, the topology and operation mechanism of IGCC ...
