Does Guatemala have solar energy?

Notably, Guatemala has seen previous ventures into solar energy, including the announcement of a 5 MW photovoltaic project in 2014 and a subsequent tender for a 110 MW project in 2019, which was later cancelled. As of 2023, the country had an installed photovoltaic capacity of 105 MW, according to IRENA statistics.

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

The project is expected to create jobs during its construction and operational phases, bringing economic benefits to the local community. According to the Ministry of ...

The project includes over 168,000 solar panels and 240 inverters, and will connect to the national grid via the Jaguar Energy Substation. Approved through public tender in ...

MPCES will use the debt facility to construct a 65 MWp solar PV plant San Patricio in Guatemala which will enter operations by late ...

The original owners of the Green Solar project approached BMR seeking financial investment. As part of its evaluation process, BMR determined ...

The Guatemala Photovoltaic Glass Project demonstrates how innovative solar technology can transform urban energy landscapes. By merging architectural design with clean power ...

Dutch clean energy developer MPC Energy Solutions has started construction of a 65MWp solar project in Guatemala, and plans to commission the project by mid-2025.
