That"s not sci-fi - it"s happening right now in Honduras" push for energy resilience. Let"s unpack why these container shutters are stealing the spotlight in Central America"s ...

Smart energy storage system that provides virtual spinning reserve capacity to maintain the stability of the grid, particularly important for the energy security of an island grid.

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal ...

In November 2024, Honduras made waves with its 75MW/300MWh battery storage tender - the energy equivalent of building a 4-hour power bank for 75,000 Honduran households [1].

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

The project, a national key initiative of Honduras, will significantly enhance the stability of Honduras" power grid and its capacity to integrate renewable energy upon ...
