How much does a 1 MW solar farm cost in India?

Setting up a 1 MW solar farm in India involves several factors that affect the total investment in solar farm solutions. The cost to build a 1 MW solar farm generally ranges from INR5 crore to INR7 crore which depends on land prices, quality of equipment & installation charges

How much does a 1 acre solar farm cost?

The cost of a 1 acre solar farm typically ranges from 1.6 crore to 2 crore covering solar panels, inverters, mounting systems & installation labor. Land costs are not included & can vary significantly by location from 3 lakh to 30 lakh per acre.

How much land does a solar farm need?

Land Size: Typically, 4-5 acres per MW are required. Larger projects may need 6-8 acres per MW to accommodate additional infrastructure. Land Costs: The cost of land for a solar farm depends on the location. It can range from 3 lakh to 30 lakh per acre. Costs depend on how close the land is to the power grid and the location.

## 2. Equipment Costs

How much money can a 1 MW solar farm generate?

A 1 MW solar farm can generate around 1,460 MWh of clean energy annually & can earn revenue of approximately INR30 lakh to INR35 lakh per year through Power Purchase Agreements (PPAs). The cost of a 1 megawatt solar farm is a long-term investment that provides consistent returns while supporting renewable energy targets.

Explore solar farm installation cost, covering land, equipment & setup expenses. Get tips to reduce costs & maximize returns on your solar farm investment.

A basic 40-foot unit with essential equipment could run anywhere from \$30k-\$45k while high-tech versions equipped with advanced automation may cost upwards of \$85k.
