How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar energy storage battery cost?

Solar batteries let you keep your lights on even when your local power grid is down. However, battery storage typically costs between \$7,000 and \$18,000. If you live in an area with frequent power outages, a solar energy storage battery is worth considering. Other equipment also factors into the overall price:

How much does it cost to store solar energy?

But to store that Solar energy for use as anything other than just topping up, requires a big store; more batteries. If you do this correctly and along with extra Batteries (4 x \$100) you uprate the Charger unit (\$185), the Alternator (\$790), the wiring (\$65), etc it starts working out expensive :
 $\$400 + \$185 + \$790 + \$65 = \$1440$.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

Maintenance and operational costs need to be factored in, usually a few hundred dollars annually, depending on the system's size ...
