How much does it cost to add a solar battery?

Adding a solar battery to an existing solar panel system typically doesn't cost much more than including it during a new installation. However, there may be additional retrofitting costs, such as resolving compatibility issues or upgrading your inverter to a battery-ready model.

How much does a solar battery cost in 2025?

The average cost to install a solar battery in 2025 ranges from \$9,000 to \$19,000, with most homeowners spending about \$13,000. The total price depends mainly on the type and capacity of the battery, as well as the complexity of your system.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does it cost to install a battery?

The total price depends mainly on the type and capacity of the battery, as well as the complexity of your system. Professional installation typically adds another \$1,000 to \$2,000, depending on local labor rates and availability. Keep in mind that incentives like the federal tax credit can help lower these costs significantly.
