We own, operate, and develop one of the world's largest renewable energy portfolios, spanning renewables, energy storage, and a range of sustainable solutions.

This article fully explores the differences and complementarities of various types of wind-solar-hydro-thermal-storage power sources, a hierarchical environmental and economic ...

Through controlled experiments with multi-objective optimization, we analyze complementarity effects on power generation and grid absorption, revealing the synergistic ...

Pumped storage hydropower (PSH) is a form of clean energy storage that is ideal for electricity grid reliability and stability. PSH complements wind and solar by storing the excess electricity ...

Governor Kathy Hochul today announced the largest state investment in renewable energy in United States history, demonstrating New York's leadership in advancing ...

Integrating hydropower, wind and solar into a unified energy system. Explores techniques and infrastructure for optimizing multi-source renewable generation.
