---

In 2022, global lithium ion battery exports reached a total value of \$3.26 billion. Thanks to their high energy density, minimal memory effect, and low self-discharge rate, ...

China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons ...

Discover which nations import the most Li-ion batteries--customs data highlights top buyers, trade flows, and rising market opportunities.

From American solar farms to European microgrids, these "power banks for civilization" are reshaping how nations store and manage renewable energy. While Western ...

U.S. import and export data on lithium-ion energy storage batteries suggest that quantity demanded increased for lithium-ion batteries and domestic production. The data also indicate ...

In this paper, we explore the evolving dynamics of supply chain competitiveness and risk in the Li-ion battery industry, focusing on the U.S. and China.
