---

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply. The ...

The second - phase project plans to invest 12 billion yuan and is expected to start mass production after the Chinese New Year next year. After production starts, the production ...

These projects cover fields such as solid-state batteries, lithium-ion batteries, sodium-ion batteries, and anode materials, signaling an accelerated pace in both industrial ...

As a solution to balancing the country's growing energy needs and mass renewable energy production, the industry has attracted ...

Battery production for electric vehicles (EVs) necessitates a supply chain capable of supporting the exploitation of a variety of raw materials.

Last year, investment in grid-connected batteries in China rose by 364% to 75 billion yuan (\$11 billion), creating the world's largest storage fleet with 35.3 GW in March.
