Iran's arid and semi-arid climate necessitates innovative strategies to address interlinked water and energy challenges. Floating solar photovoltaic (FSPV) systems offer a ...

As energy needs increase and fossil resources decrease, the development of grid-connected photovoltaic energy is becoming an important part of the energy mix in the majority of countries.

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, ...

Summary: Iran's first utility-scale energy storage system integrated with a photovoltaic plant has begun feeding electricity into the national grid, marking a critical step in stabilizing renewable ...

Iran is in talks with several leading Chinese companies to develop solar power plants and battery energy storage systems (BESS) as part of its strategy to increase ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, and the promising yet challenging road ahead.
