Using this, the team designed a lab-scale, iron-based flow battery with unparalleled cycling stability. According to the study paper, ...

At the center of the design is a lab-scale, iron-based flow battery with unparalleled cycling stability. Researchers at the Department ...

This battery stores energy in a unique liquid chemical formula that combines charged iron with a neutral-pH phosphate-based liquid electrolyte.

Researchers at the Pacific Northwest National Laboratory have created a new iron flow battery design offering the potential for a safe, scalable renewable energy storage system.

Researchers at the Pacific Northwest National Laboratory have created a new iron flow battery design offering the potential for a safe, ...

A new iron-based aqueous flow battery shows promise for grid energy storage applications.
