-----  
What zoning laws do cell towers need?

Local zoning laws dictate where and how cell towers can be installed. Companies usually must get permits from local government before proceeding. Being familiar with these regulations helps you understand whether a tower's placement is legitimate and what your options are if you have concerns. 3. Land Use Rights and Easements

What equipment is included in a base station?

ed herein or any equipment associated with a tower. Base Station includes, without limitation: Equipment associated with wireless communications services such as private, broadcast, and public safety services, as well as unlicensed wireless services and

Where should cell base stations be located?

An analysis of 100 studies published in Environmental Reviews found approximately 80% showed biological effects near towers. "As a general guideline, cell base stations should not be located less than 1500 ft from the population, and at a height of about 150 ft" (Levitt 2010).

Should you install a cell tower on your property?

Receiving a notice about a cell tower being placed on your property can be unexpected. Or perhaps you've seen construction crews getting ready to install one nearby. While these towers are crucial for modern communication, many property owners feel uncertain when faced with their potential installation close to home.

While these towers are crucial for modern communication, many property owners feel uncertain when faced with their potential ...

Eligible Facilities Request. Any request for modification of an existing tower or base station that does not substantially change the physical dimensions of such tower or base station, involving:

(1) Base station. A structure or equipment at a fixed location that enables Commission-licensed or authorized wireless communications between user equipment and a communications network.

Every municipality is responsible for adopting its own set of laws governing the placement, design standards, and safety features of wireless telecommunications equipment installed and/or ...
