By embracing progressive policies like dynamic tariffs and decentralized solar with several connection mechanisms, Jordan ...

The solar thermal and solar PV air-conditioning systems were designed and simulated to compensate the cooling demands. It was found that the annual cooling energy accounted for ...

This study examined two different options: a coupled PV and air conditioner system and a solar cooling system (absorption chillers where thermal energy is provided by solar collectors) for a ...

By embracing progressive policies like dynamic tariffs and decentralized solar with several connection mechanisms, Jordan demonstrates how countries can enhance energy ...

This paper presents the experimental results of a solar photovoltaic air conditioner system to study the heating and cooling performance of system in the hot summer and cold ...

The objectives of this study are to examine the use of the technology of Cooling Air by Solar Energy (CASE), which is used in air-conditioning applications to minimize the ...
