Under the project and with USAID support, JERA worked to strengthen the resilience of Jamaica's energy sector by accelerating the uptake of distributed solar ...

To meet Jamaican residents' needs for reliable, clean electricity and capitalize on the region's abundant solar resources, we recently installed and commissioned a 10kW ...

But to a large extent, it's a very impacting project and we hope to be able to expand these to other facilities to also help to see a change in terms of our energy consumption in health facilities.

The hospital has installed a solar PV system combined with battery storage, resulting in a significant reduction in energy costs and ...

To sum up, from PV power plants under-frequency regulation viewpoint, the energy storage should require between 1.5% to 10% of the rated power of the PV plant. In terms of energy, it ...

With the installation of a grid-tied solar photovoltaic (PV) system, coupled with the replacement of all incandescent bulbs with energy-efficient LEDs, the Rehab Centre is on target to generate ...
