---

Welcome to South Tarawa, Kiribati - ground zero for climate change and the unexpected testing ground for one of the Pacific's most innovative energy storage projects. ...

That's Kiribati's reality - 33 coral atolls facing energy poverty and climate threats simultaneously. With 70% of urban households experiencing daily blackouts during peak hours, the urgency ...

Aim: Transition Kiribati to a climate resilient solar photovoltaic generation and a battery energy storage system. Component 1: Solar photovoltaic and battery energy storage system installed.

Final thought: As Kiribati races against rising tides, energy storage isn't just keeping lights on - it's keeping hope afloat. From village battery shares to typhoon-proof systems, these solutions ...

The project will install a solar and battery energy storage system and build institutional capacity including preparation of a draft energy act to increase deployment of renewable energy and ...

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional capacity across the sector, including through ...
