Based on simulations performed for various levels of vRES installed capacities, we evaluated the hosting capacity of the Latvian grid for each of the innovative measures in study.

As more solar systems are added to the grid, more inverters are being connected to the grid than ever before. Inverter-based generation can produce energy at any frequency and does not ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This paper presents a European-wide techno-economic and environmental assessment of retrofitting 5G macro-cell base stations with grid-connected solar photovoltaic ...

As more solar systems are added to the grid, more inverters are being connected to the grid than ever before. Inverter-based generation can ...

An STS converts LV AC power generated by solar inverters into medium-voltage (MV) AC power and feeds it into a power grid.
