Extensive cycling of the soluble lead flow battery has revealed unexpected problems with the reduction of lead dioxide at the positive electrode during discharge. This has ...

In this work, lead dioxide nanostructured electrodes were tested in order ...

Soluble lead redox flow battery (SLRFB) is an allied technology of lead-acid batteries which uses Pb^{2+} ions dissolved in ...

Soluble lead redox flow battery (SLRFB) is an allied technology of lead-acid batteries which uses Pb^{2+} ions dissolved in methanesulphonic acid electrolyte. During ...

The soluble lead flow battery (SLFB) is a hybrid flow battery that stores energy in the form of solid lead and lead dioxide electrodeposits at ...

A flow battery, or redox flow battery (after reduction-oxidation), is a type of electrochemical cell where chemical energy is provided by two chemical ...
