Malawi's BESS is expected to demonstrate that this approach - renewable energy with battery storage - offers a resilient low carbon development path. The direct result of this project will ...

The project will back up power for households and businesses connected to the grid in the event of outages, such as those experienced after the country was hit by Cyclones ...

The state of the art power plant is the first utility-scale grid-connected hybrid solar and battery energy storage project in Malawi and the largest in Sub-Saharan Africa.

Our BESS project will provide peak power, support renewable energy integration, and enhance overall grid stability. By harnessing and storing low-cost surplus power and balancing ...

Learn how a grid-integrated Battery Energy Storage System (BESS) enhances power stability in Malawi for a reliable and sustainable energy future.

With DFC's support, the new solar photovoltaic plant is the first utility-scale grid-connected project in Malawi with a 5MW/10MWh battery energy storage system included in the plant.
