The results of coupling our plant with an on-grid PV system and wind turbine show that it was able to reach an electrical coverage of about 72% of the wastewater treatment ...

This structured and comprehensive article aims to provide insightful, authoritative content that addresses the complexities of containerized wastewater treatment.

A case study of the synergy between wastewater treatment plants and photovoltaic systems, aiming to improve the energetic, environmental and economic impacts, is presented.

As wastewater treatment plants (WWTPs) contribute to climate change by emitting greenhouse gases (GHGs), this study estimated the total GHG emissions of WWTPs by ...

In this work, the economic profitability and environmental utility of installing the grid-connected photovoltaic system in wastewater treatment plant were studied.

This study proposes a grid-connected solar-wind-hydro energy system for a wastewater treatment plant and explores the optimal planning strategies. The method ...
