France-based independent power producer (IPP) Qair Energy will deploy 60MWac of solar-plus-storage projects on the island nation of Mauritius after it won a state tender.

This system is designed for residential use, combining energy storage batteries, solar panels, and smart control technology. It ensures maximum energy efficiency by optimizing solar power ...

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible within reasonable costs. Solar photovoltaic (PV) and battery energy ...

The CEB has installed the first grid-scale Battery Energy Storage System (BESS), the first in its kind in Mauritius, to enable high capacity storage of renewable energy in the grid.

Qair announces the closing of a new loan to support the implementation of a hybrid solar and battery storage project in Mauritius.

Mauritius is set to benefit from Qair's new hybrid solar and storage project, a significant development that will enhance the nation's energy security and accelerate its shift ...
