Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

Where can I find information on energy access in Mauritius?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Mauritius on the IEA homepage. Find relevant information for Mauritius on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

What is Mauritius' long term energy strategy?

The Government of Mauritius' Long Term Energy Strategy 2009-2025 aims to increase the share of renewable energy in our energy mix to 35% by 2025. This includes reducing the country's dependence on coal and heavy oil for electricity generation.

Renewable energy developer Qair has secured financing from SBM Bank (Mauritius) Ltd for its Stor"Sun I and II hybrid solar-plus-storage projects. These two projects ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage ...

Ultimately, this hybrid solar and storage project is more than just an energy plant; it is a cornerstone for a cleaner, more resilient energy future for Mauritius.

Renewable energy developer Qair has secured financing from SBM Bank (Mauritius) Ltd for its Stor"Sun I and II hybrid solar-plus ...

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible

within reasonable costs. Solar photovoltaic (PV) and battery energy ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and ...
