---

Among most people, there is a misconception that we can't mix different brands of panels, but after certain testing, it is found that it does work. But there are a few things that you ...

For a parallel setup, both units need to be identical and even recommended to be of the same hardware revision, and of course same software revision.

Wiring Solar Photovoltaic Panels in Series Wiring Solar Panels of Different Ratings in Series Wiring Solar PV Panels in Parallel Wiring Solar Panels of Different Ratings in Parallel Mixed Wiring of Solar Panels Here is a parallel connection of solar panels of different voltage ratings and the same current rating: As you can see, things are getting worse, since the total voltage of the array is determined by the solar panel of the lowest voltage rating: we received 11% loss of installed solar power. Let's see what happens when we bring even more diversity ... See more on solarpanelsvenue
